Technical Training Program:

1. Introduction

- Training's Goals

2. Installation

- Server
- Client
- Translation files

3. Discovery

- Main Interface
- Module Management

4. Module Settings

- Base, CRM, Accounting, Stock,
- Production, ...

5. Administration

- Users, Groups, Rules
- Access Control List
- Module Management, logs

6. Architecture

- Server/Client Oriented
- Client GTK 2
- Communication: XML-RPC

7. Directories and File Structures

- Module location
- One directory per module
- Module content

8. OpenERP Object

- Definition
- How to define simple fields.
- Exercises

9. XML Flow

- Syntax
- Structure

10. View Introduction

- Principles (Views, Actions, Menus)
- Syntax for Simple View
- Actions and menus
- Exercises

11. Objects in Depth

- Complex Fields
- Relational Fields
- On Change Event
- Attributes « fields »
- Default Value
- Constraints
- Inheritance
- Objects Access
- Predefined Methods

12. Views in Depth

- Attributes for the field tag
- More Tags
- List View
- Tree View
- Graph View
- Calendar View
- Gantt View
- inheritance

13. Workflows

- Use case
- Principles
- Terminology
- Definition / Modification

14. Reports

- Principles
- Introduction
- OpenOffice
- Exercises

15. Wizards

- Principles
- Definition
- Exercises

16. How to create a simple module

- Objects
- Views
- Demo & Data
- Workflows
- Report

17. Backup

- Backup
- Restore

18. XMLRPC Interface

- Use Cases
- Principle
- Methods
- Example in Python
- Example in PHP

19. Load/import data

- CSV Import
- Relational Fields
